9508232635
Bhubaneswar, India

Summary

Information Technology student with interests in cybersecurity, cloud computing, and software development. Experienced in developing security-focused applications, cloud-native solutions, and AI-powered platforms through internships and technical projects. Demonstrates analytical thinking, problem-solving, and collaboration skills, with a commitment to continuous learning and emerging technologies.

Education

Bachelor of Technology (B.Tech) in Information Technology

Kalinga Institute of Industrial Technology (KIIT) • Bhubaneswar, Odisha

06/2027

Skills

Python, C++, SQL (MySQL, PostgreSQL), Data Structures & Algorithms, Docker, Cloud Computing, AWS IAM (Basic), Network Security, SIEM Fundamentals, Log Analysis, Operating Systems (Linux, Kali Linux, Ubuntu, Windows), Python Libraries, Team Leadership

Experience

Cybersecurity Intern

Syntecxhub • Remote

04/2026 - 05/2026

- Engineered cybersecurity solutions including a CVE Scanner, Web Vulnerability Scanner, Password Manager, and Encrypted Android Chat Application.
- Developed secure applications using Python, Kotlin, Firebase, and AES encryption for vulnerability assessment and data protection.

Cybersecurity Team Member

CyberPeaceCorps - KIIT Chapter • Bhubaneswar, Odisha

01/2025 - 05/2026

- Organized CTF competitions and cybersecurity awareness programs for students.
- Provided technical support for security tools and lab environments.
- Led and assisted cybersecurity training workshops for volunteers.
- Collaborated with team members to ensure successful event execution.

Blockchain Intern

Launched Global • Remote

05/2025 - 06/2025

- Developed and tested a blockchain-based decentralized application while gaining hands-on experience in smart contracts, distributed systems, and cybersecurity fundamentals.

Projects

1. AI Kubernetes Threat Detection System

- Developed an AI-powered cybersecurity monitoring platform for Kubernetes environments using Isolation Forest-based anomaly detection and rule-based threat analysis.

- Built a real-time SOC dashboard and deployed the solution using Docker, Kubernetes, and AWS EC2 to demonstrate cloud-native security monitoring and DevSecOps practices.

Tech Stack: Python, Scikit-learn, Streamlit, Docker, Kubernetes, AWS EC2

2. StoreSignal — AI Readiness Intelligence for Shopify

- Developed an AI-powered platform to evaluate how AI shopping agents interpret Shopify product listings and store content.
- Built Shopify data ingestion pipelines, FastAPI backend services, and a React dashboard to identify AI visibility gaps and generate actionable recommendations.

Tech Stack: Python, FastAPI, React, Shopify API, Pydantic.

Certifications

Web Security – DevTown, Blockchain – Launched Global, Ethical Hacking – Atil Samancioglu
